

Your Complete Blockchain Solutions Suite

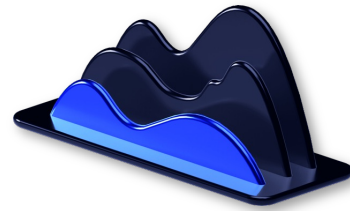

Digital Assets Exchange Solutions

ChainUp's digital assets exchange systems are built according to user preferences and customized by region to provide seamless user experience. We are the top choice for over 400 global cryptocurrency exchanges.

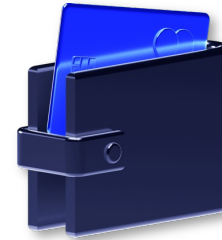

Trading Functions

Our complete trading systems include all of the cryptocurrency trading functions on the market, such as spot trading, derivatives trading, leverage, ETFs, OTC, etc. We offer these across three different interfaces: desktop, H5 mobile sites, and mobile apps.

Liquidity

We offer liquidity that is on par with those of the top exchanges. Access our liquidity to ensure that your users can trade confidently.

Wallet

Our underlying wallet solutions utilize ChainUp Custody which supports the main chains and cryptocurrencies of the three major exchanges, and implement separation of hot and cold wallets, hot wallet signatures, and cold wallet multi-encryption mechanisms to ensure asset security.

Operational Tools

We have developed a variety of operational tools to support clients in gaining traffic and active users.

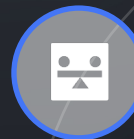

Exchange Solutions

Trading Functions

**Trading
Functions**

Derivatives trading system

Payment system

NFT trading system

Spot Trading System

Multiple Transaction Types

Supports leveraged trading and ETF trading modules; multiple types of trading currencies.

High Mobility

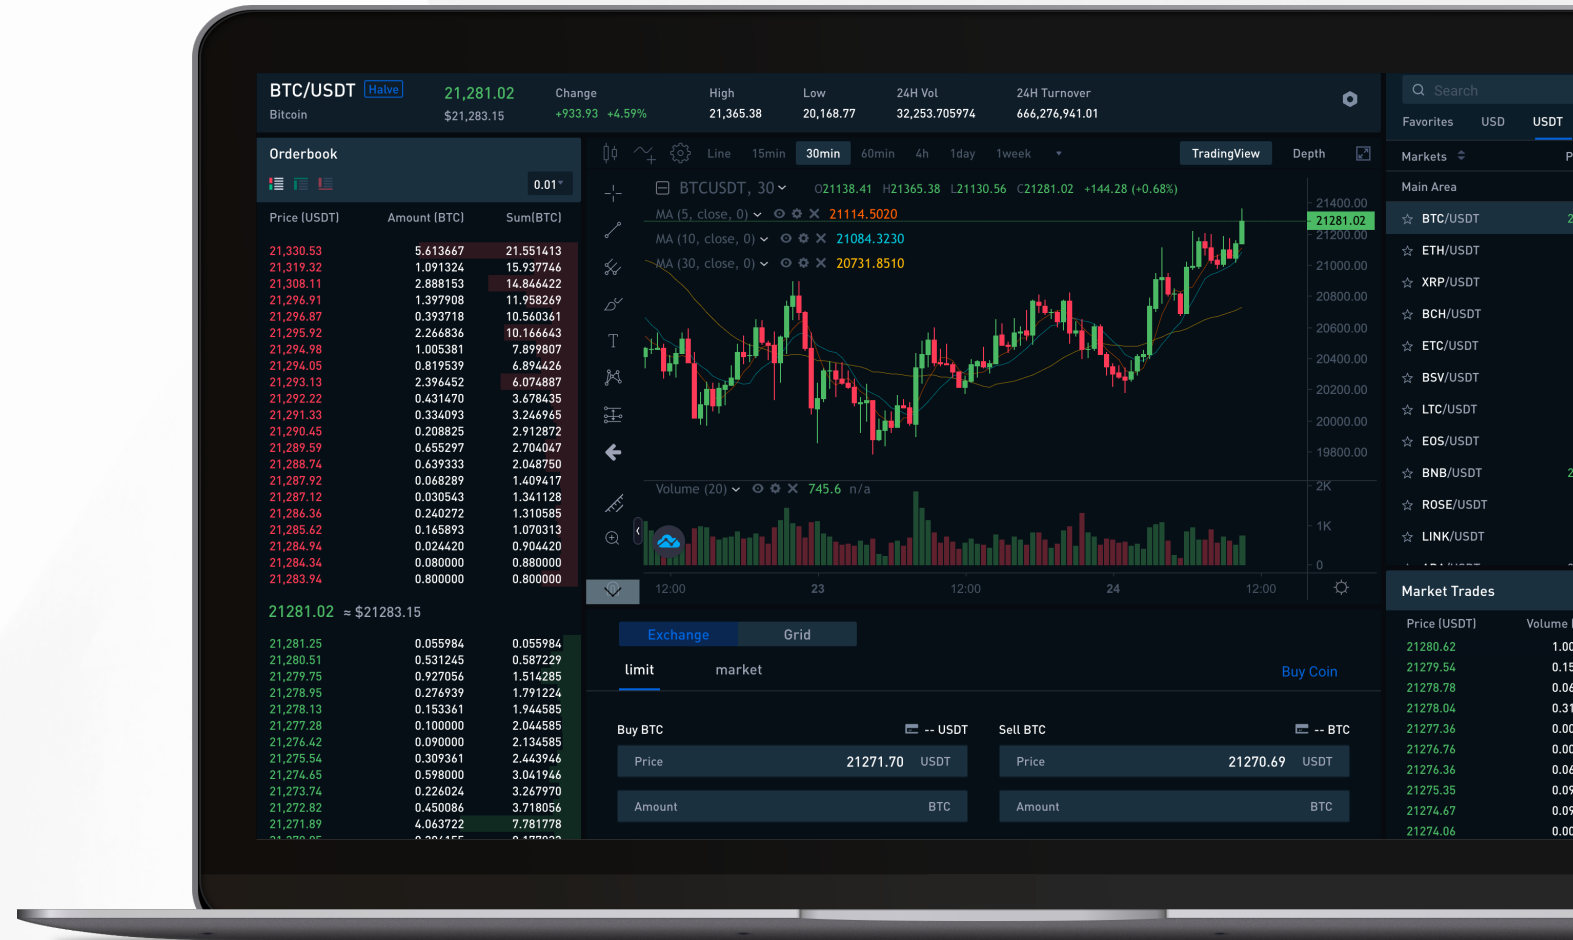

Integrates professional market-making teams, mainstream cryptocurrencies, and shared liquidity pools on all platforms, with no transaction delays.

Token Listing Functions

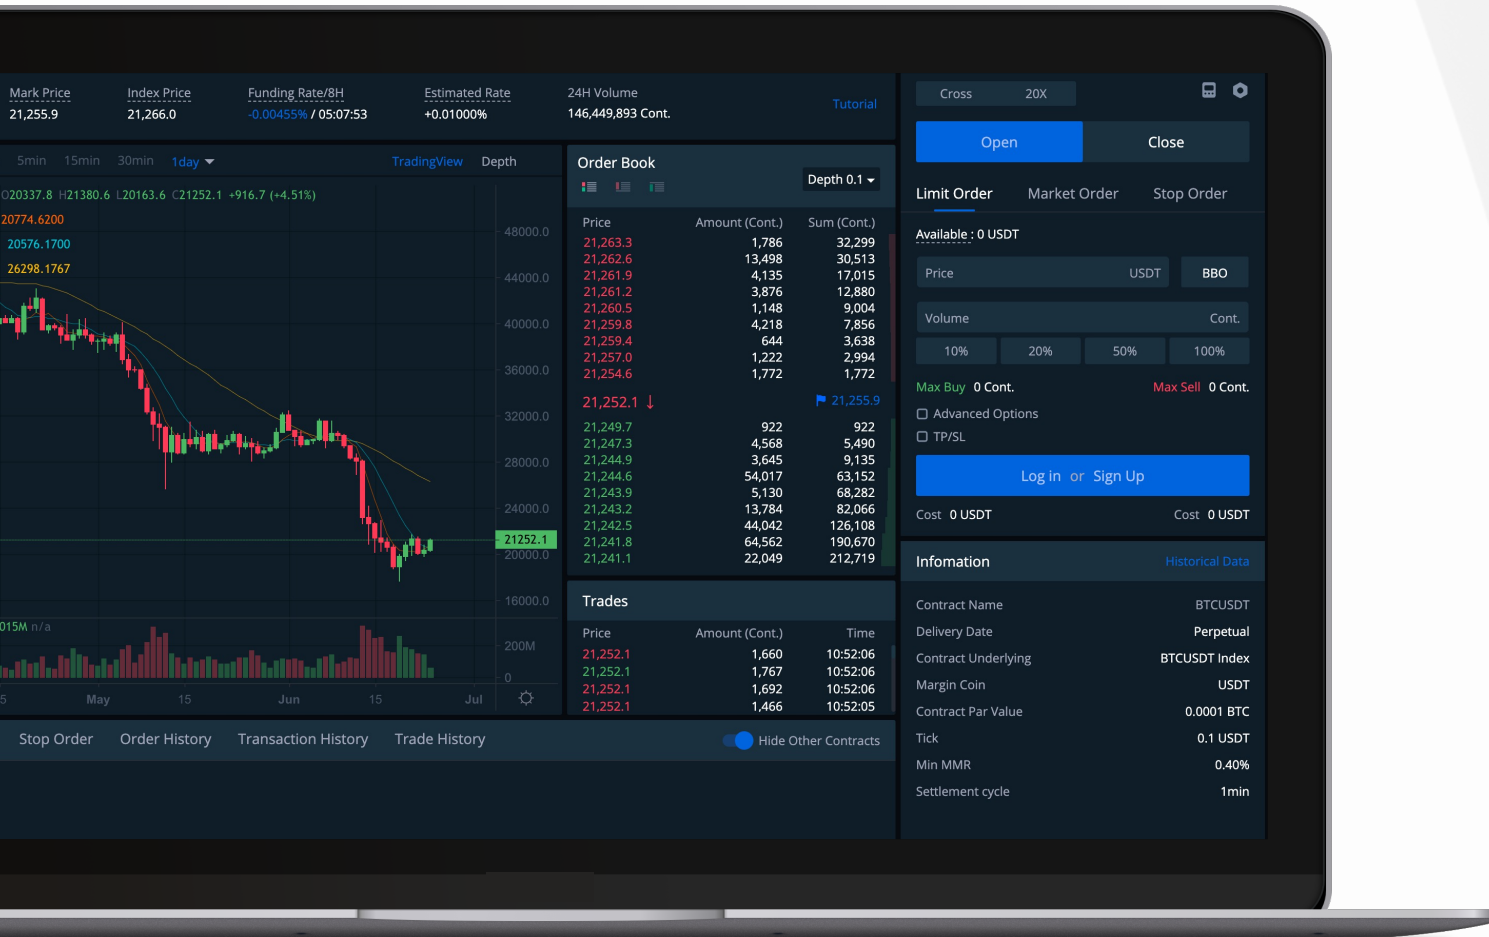

Supports ERC20 and TRC20 type tokens; ability to configure cryptocurrencies; enable users to access high-quality projects.

High-performance

Distributed memory matching, placing orders for mid-level hardware configuration, single token pairs can reach 50,000 TPS.

Derivatives Trading System

Diverse Range of Products

Supports USDT-margined and cryptocurrency-margined derivatives, offering end users a wide range of choices.

Multiple Operational Tools

Value-added services such as derivatives brokerage, merchandising, and bonuses to help your exchange gain initial traction.

Leading Matchmaking Engine

Stable and efficient distributed matching engine, with TPS of up to 50,000 and minimal one millisecond transaction delays.

Financial Risk Control

Product, technology, system monitoring and other aspects with more than 10 financial risk control mechanisms, enabling your system to run at ease.

Payment System

Compliant Deposits and Withdrawals

Supports C2C deposits and withdrawals, fiat currency deposits, third-party deposits, KYC processes that comply with FCA regulatory requirements and GDPR information management principles; AML mechanisms that meet international standards.

Multiple Payment Methods

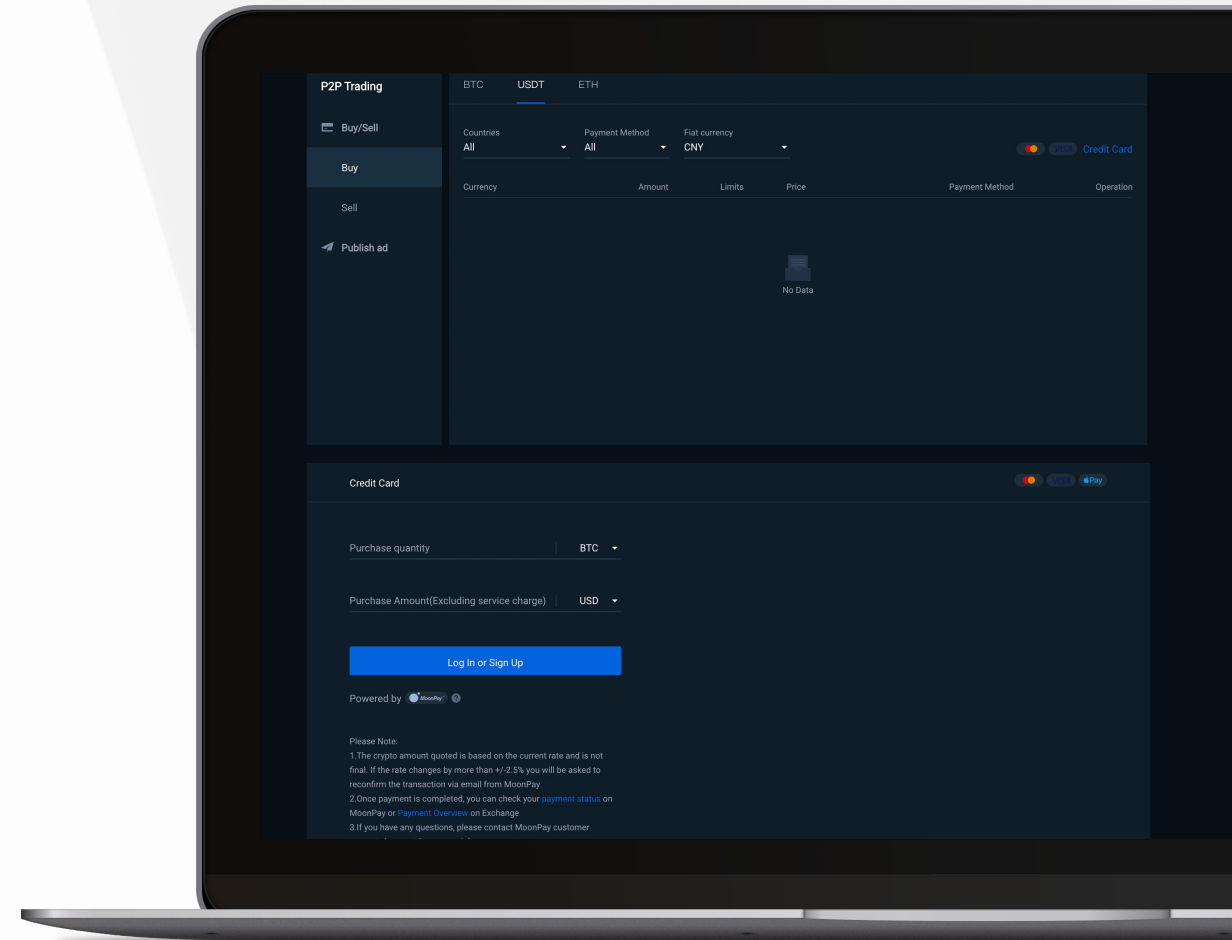

Supports Visa, MasterCard, Apple Pay and other credit card payments; supports bank card payments and third-party payment channels.

Buy Crypto with Multiple Fiat Currencies

Supports fiat-to-crypto exchanges across more than 150 countries and regions, 126 currencies such as USD, GBP, EUR, etc. Users can purchase more than 40 mainstream cryptocurrencies.

Auditing of Deposits and Withdrawals

Security auditing of deposits and withdrawals, user KYC authentication to prevent swiping orders, currency merchant margin systems to ensure the security of funds.

NFT Trading System

Flexible Deployment

Supports centralized and decentralized deployment, complete the building of the entire system simply and quickly, multi-merchant SaaS version, more convenient configuration and lower operating cost.

Diversified Transactions

Supports NFT transactions in various environments such as pricing, trading or bidding, and supports multi-currency (such as platform currency, main chain currency, etc.) for transactions.

High Security

NFT data will be stored on IPFS, decentralized storage ensures data stability and reliability.

Multiple Chain Support

Supports a variety of chains to choose from. Clients may choose one of the supported chains to be deployed by the team. Clients may also set the platform currency to be used for transactions, or other currencies, and currencies can be switched freely.

Depending on **your business needs**,
we will provide the **most suitable deployment solution** for you.

If you

- have market
- have operational capability but lack of technicians

SaaS (Public Cloud)

If you

- have market
- have operational capability with technical staff
- want to deploy independently but want to save cost and do not require source code

Privatization (Hosting)

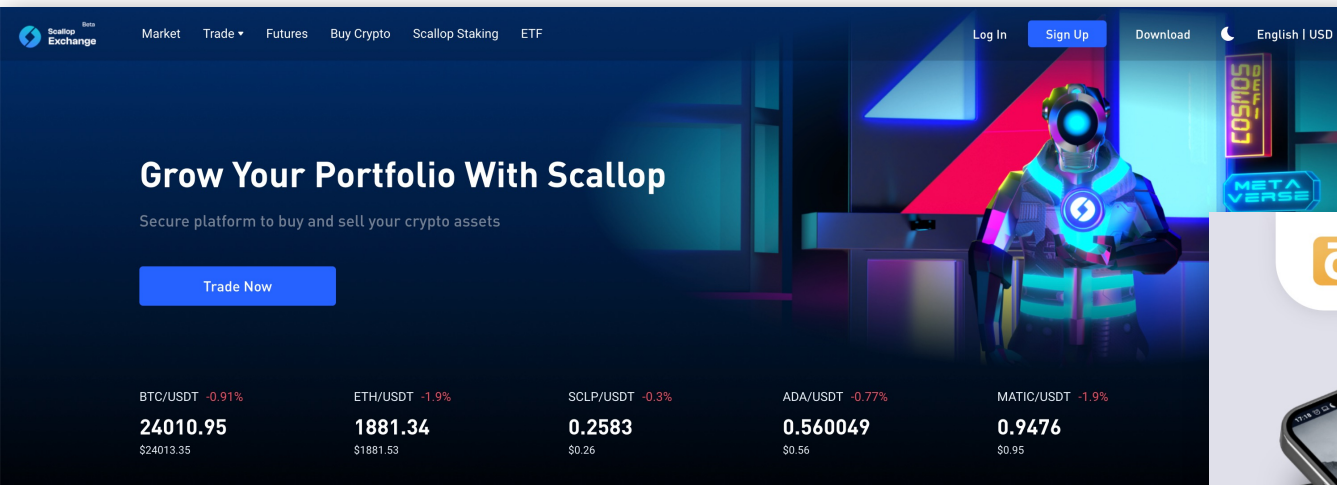

If you

- want to fully master the trading system
- wish to customize the system to the maximum extent according to own operational ideas
- want to serve designated/special countries

Privatization
